DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-28, 38 54, 57 59, 68 84, 87 89, 98 114, and 117 119
 are drawn to carrier frequency offset, classified in class 375, subclass 326.
 - II. Claims 29 37, 60 67, and 90 97 are drawn to symbol timing, classified in class 375, subclass 355.
 - III. Claims 55, 56, 85, 86, 115, and 116 are drawn to channel estimation, classified in class 375, subclass 346.
 - 2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as carrier frequency estimation. See MPEP § 806.05(d).
 - 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
 - 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
